

GERM-STOP

SANITIZING FOOD ARE DEGREASER & HARD SURFACE CLEANER CONCENTRATE

GERM-STOP is a sanitizing quality hard surface cleaner and food area degreaser, incorporating high active detergents and powerful quaternary bactericides to provide effective germ kill and removal of fats, oils and greases.

Excellent for one-stage cleaning and disinfecting. The blend of QAC bactericides provides a wide spectrum of activity against microorganisms commonly encountered in food processing areas.

Preferred to chlorinated products because of its lack of odour.

Safe on all materials of construction.

Ideal for use on all work surfaces, machinery, baking tins and utensils, plant, bain maries, process equipment, conveyors etc.

Dilutes quickly in hot or cold water, and its emulsifying action holds dirt and grease in suspension, enabling easy rinsing.

At higher concentrations in hot water it will emulsify even solidified grease and oils.

Use by spray, sponge, or mop and bucket. First dilute GERM-STOP with up to 40 parts water, preferably hot, according to strength of solution required. Apply, and allow to dwell for a few moments, then rinse off with clean, fresh water.

For cleaning and disinfecting hard surfaces at QAP 50, GERMSTOP is designed to be effective at a dilution of 1:60.

STORAGE AND HANDLING: Keep tightly closed in original containers. Keep away from sunlight and extreme temperatures.

COSHH Data: A safety data sheet (MSDS) providing additional information is available on request.

pH 11.0

Packaging Sizes:

- 4 x 5 litre jerrycans
- 25 litre drums
- 210 litre barrels

BENEFITS:

- Formulated for the food industry and catering
- Contains effective odourless QAC bactericides
- Easily emulsifies grease
- Versatile & economical
- Safe on all materials of construction
- Effective against gram pos and gram neg organisms, yeasts and spores
