

BAC-HAND

Antibacterial Liquid Soap

BAC-HAND is fragrance-free, preferred in the food industry, and employs no harsh chemicals or solvents. The risk of skin damage and infections is thus dramatically reduced. For added protection, skin conditioning agents are incorporated into the formulation.

BAC-HAND is suitable for all industries where a sanitizing soap is required, including nursing homes, hospitals, schools, janitorial, manufacturing, etc., but especially for the food processing industry and catering, where a sanitizing properties are essential. Use regularly to prevent cross infection from hand contact.

Complies with EU Approvals:-

- BS EN 13727 for use against MRSA, Salmonella Typhimurium, Listeria Monocytogenes;
- BS EN 1276 for use against Pseudomonas Aeruginosa, Escherichia Coli, Staphylococcus Aureus, Enterococcus Hirae;
- BS EN 13704 for use against Clostridium Difficile;
- BS EN 13727 for us against Pseudomonas Aeruginosa, Escherichia Coli, Staphylococcus Aureus, Enterococcus Hirae

New BIOCIDES DIRECTIVES are now in place which have effectively removed a large number of approved 'Raw Materials' from the market place.

We have been working to ensure that we can offer a finished product which meets the new requirements, using a 'Broad Spectrum' Anti-Microbial raw material. BAC-HAND has been developed as a result, tested and approved within the new guidelines to meet a greater number of Bacteria strains for the Food and Medical areas.

A powerful sanitizer is incorporated, which is effective against a broad spectrum of bacteria.

The product is equally active in both hard and soft water.
